As a BCHydro customer, the father of children and subsequent Grandchildren who will wear the costs or benefits long after I'm gone, a taxpayer and a Director on our Regional District I'd like to submit my comments.

Although I do not agree with the process so far, the true long term value to the citizens of BC and the First Nation and local property owners treatment, I feel that the project has gone too far to cancel.

Besides money already spent, possible, if attainable, remediation of affected lands and contract cancellation costs - it should proceed but in future a better job needs to be done with the citizens before high profile, for political gain projects are "ramrodded" through.

Dave Brocklebank
